

TOP SECRET

URITY INFORMATION

1. PROJECT: BCFIEND (in HTSTEIN only)

2. AUTHORIZED DURATION: Indefinite

3. ORGANIZATIONAL DATA: 16 October departed for LCDRINK to report for his PCS.

22 October arrived in HTEXOTIC to assume duties as secretary for

4. OPERATIONAL DATA: Introduction:

The principal activity of BCFIEND for the month of October was the FIEND-VALUABLE meeting that was held in TPCREDO on the 22nd of the month and which lasted for four days. VALUABLE was represented by and his staff: among him on our side were

and VALUABLE stressed that ZRCROWN favors an independent HTFLOWERLAND and secondly, that a greater understanding between HTNEIGH and VALUABLE was to be encouraged. Emphasis was placed on a firm policy in directing any all-out operation against the BGGYPSY regime; otherwise any agreement between the two exile committees would be useless with respect to controlling Robert B. Keevil and his possible ambitions toward HTFLOWERLAND. Propaganda was discussed: mailing campaigns should be accelerated and more should be done in publicizing HTNEIGH to the world.

In the matter of propaganda supply drops, BCFIEND and VALUABLE are to exchange technical data and collaborate on suitable items but to operate distinctly individually. With respect to intelligence it was agreed that the FIEND-VALUABLE intelligence exchange program is being exploited at near-maximum levels and that the real problem of securing better intelligence will depend largely on securing the services of better agents. A resume of FIEND operations for the past year was read which included the number of bodies infiltrated and still on hand, leaflet missions plus resupply drops and infiltration by air.

VALUABLE included the number of teams they have infiltrated, showing whether by sea or overland. In the final wind up of this meeting reemphasis was placed on greater integration of FIEND-VALUABLE operations and, for the future, the importance was stressed of not using low-level agents on these teams. It was conceded that most of the failures of the 1951 teams resulted directly from the use of low type agents.

1 October Writer established contact at a safe house with Identity (A1) and supplied him with 5 JBPARTSON

envelopes containing

envelopes containing photographs and descriptions of HTFLOWERS who had either been fired or resigned from Lally's JBPARTSON. Identity (1) is having these men followed to establish what contacts they are making and what letter drops they were having access to.

2 October - Took off for BCMIDDY to meet [ ] at airport coming in from ZRMETAL, TPCREDO, BCMIDDY. He missed the plane so I stayed overnight and met him the next day. (On my way to BCMIDDY to lay on this meeting I called at DTELDER Headquarters and contacted [ ] and Identity (2) with reference to the coming disposal problem of HTFLOWER prisoner, Identity (3). [ ] pointed out that ZASEDAN would not consent to retain him in confinement beyond "D Day: December 3".)

3 October - Accompanied [ ] to [ ] office and a general discussion took place concerning the disposal of rejects. [ ] was present. The topic of the coming closing-down of KMFARCE was mentioned along with possible transfer of this function to some smaller HTCURIO welfare organizations. [ ] endorsed the idea of paying to families of agents killed in the field a monthly stipend of \$50. Similar provision was made for the two HTFLOWER characters badly burned in the gasoline fire at JBPARTSON until such time they could be taken care of medically by the JBHOMER economy, although the accident was the direct result of their carelessness and disobedience to rules. On 3 October [ ] appeared at this office and stated that he was on a tour representing [ ] He pointed out to [ ] that the Home Office places a great deal of emphasis on these monthly reports, particularly so because Robert A. Ascham, who is in the process of selling ZACACTUS to Capitol Hill, likes to have some of this material on his desk for reference use. [ ] indicated that he was originally sent over here to set up an intelligence service within ZACACTUS in HTSTEIN. He requested that any documentation material regarding the "creeps" should be forwarded to him in BCMIDDY.

4 October - Was invited by ZRCROWN agent RNPICKER to have luncheon at the FrankfurterHof at which time I turned over to him some money (accrued arrears in favor of the four HTFLOWERS (W/T's) delivered to him by writer a month before in our safe house).

On the same date drove [ ] and his wife with numerous baggage via the Autobahn from BCMIDDY to HTEXOTIC and checked them in at the Astoria Hotel. Writer contacted [ ] from the school that evening and delivered to him the pay vouchers due the instructors.

5 October

TOP SECRET

5 October - Introduced [ ] to [ ] at HTEXOTIC and arranged for a credit on [ ] in her favor. [ ] and she went on a shopping tour PX, etc., to acquire material for the coming four-day BQFIEND conference in TPCREDO. Contacted [ ] to call on [ ] who was very ill with the grippe at his hotel. That afternoon writer drove out to Wangness estate with [ ] who inspected the property to ascertain its security risk. We made a thorough inspection of the house and grounds and later a complete report with recommendations was submitted. Returned HTEXOTIC at 1930 hours.

8 October - Was contacted by [ ] in HTEXOTIC. Got off a cable to [ ] regarding the Wednesday October 5 night airlift, to LCDRINK and contacted [ ] at BQMIDDY to lay on request for air transportation.

10 October [ ] and writer went to Wangness at 1400 hours. Writer gave a brief congratulation and farewell address to HTFLOWERS following which they gathered in the courtyard, the scene of parting embraces and final loading aboard. As we started out we spotted a woman casing the estate grounds from a hill overlooking the gate-way. We froze the convoy under shelter for 15 minutes to wait for an opening to proceed. Time being of the essence we were compelled to run the "blockade" and struck out for the main road. The writer, who was aboard the loaded HTFLOWER truck ran back to tip off [ ] to put [ ] on a casing job of this woman whose actions were of a highly suspicious nature. We reached the air base in HTEXOTIC area at 1840 hours. Some slight confusion appeared when the writer made contact with the desk sergeant at night operations who disclaimed any advance notice of a "black air mission" due in that evening. The writer was fortunate, after some delay, in a priority contact with ZASENATE OPS at QKCHRRY and the misunderstanding was straightened out. The writer, being in uniform as usual for this type of operation, found this of much assistance in securing freedom of access to wing platforms to permit contact with Lt. Lear and secure his assistance in obtaining covert clearance for unloading procedure. The C-54 came in on schedule. As it was cold and windy the HTFLOWERS remained huddled inside the truck and, thanks to excellent cooperation by the ZASENATE OPS Officer, we obtained a bucket of coffee and dished it out to all the bodies. When the airplane arrived, [ ] was aboard and assisted at the loading. The writer secured a "fork" from ZASENATE Repair Shops to raise the cargo to plane floor levels. Due to an oversight, [ ] had failed to notify us as to net weight of the crates which exceeded 800 lbs.

A brief counsel

87764

TOP SECRET

A brief counsel was held on the field with the ZASENATE personnel more or less insisting on leaving some of this gear behind, as it would otherwise require knocking out the stays in the rear of the plane to secure head clearance. In the end we won out and got all gear safely stowed aboard back of the bodies.

To avoid another embarrassing call-down by ZASENATE Operations, following a previously badly soiled airplane, the writer passed out PX paper sacks to the bodies in preparation of rough weather. Plane became airborne at 2120 hour

11 October - Met [ ] and wife in HTEXOTIC. He and I drove out to Wangness and were escorted over the house and grounds by [ ], later joined by [ ] RINDLING, and [ ]

Same evening went out on operations. Met [ ] at 2330 hours at the Excelsior Hotel; we left and picked up two 2½-ton trucks in a covert alley and drove to air base near HTEXOTIC at 0030 hours. This was a reception for inbound plane from LCDRINK due at ZEBRA 0100. Plane arrived on time and [ ] and writer procured coffee and doughnuts, to warm up incoming HTFLOWERS. Writer wore uniform again and obtained approval from the tower-command to dock plane in a bomber lot adjacent to Operation We checked in 23 bodies. Escort Officer, [ ] reported airplane was clean, both outbound and inbound. The only flap consisted in not knowing the total weight of the equipment crates prior to takeoff. Aboard the airplane, acting as body escort, was [ ] returning from LCDRINK. It was necessary to make a late tour of the hotels in HTEXOTIC to find lodgings for him as no advance notice was given of his return.

12 October - Contacted [ ] of the JBPARSON and gave him all the KMFARCE papers on the 23 bodies who came in the night before and requested him to supply papers on the 7 physical unfit HTFLOWERS and the background of the two JBPARSON members who received severe burns last January to take same to [ ] at the forthcoming TPCREDO meeting.

15 October - Contacted [ ] regarding the release of training films. Went to Signal office at LCLAVER and contacted the staff handling film releases. Spent one hour combing catalogue and selected 16 films of 25-48 minute lengths. They are a combination of combat releases and recreational films. Informed we were required to have a licensed operator to run these films. To improvise and comply we produced [ ] and we elected [ ] to be the alternate

for this role

TOP SECRET

for this role and take a training course which requires two days. By applying for special consideration on the part of the officer in charge of licensing film operations, we succeeded in getting young [ ] to take the test after intensive on the spot drilling. He passed it one hour later. The ZASENATE Signal had a number of films in stock (restricted in number) but the majority of pictures useful for the Wangness School require advance ordering. Since access of these films has been set up, [ ] reports that they are well received by the trainees and to date a steady run of these films have been shown. Present plans call for continued use of this equipment.

We received the bad news on Radio LYCEUM regarding the capture and disposal of members of our infiltrated teams into FLOWERLAND. [ ] felt the shock of that seems enough to justify considering a total withdrawal from this entire training area after keeping up appearances for a month or two longer. He feels we are too near the BGGYPSY steamroller, only 6 hours away in case of attack. He also felt that this flap is jeopardizing other operations which he is concerned with. In discussing the "where-to-go-from-here", [ ] suggested possibly some Island off the coast of LCRADON but certainly not KMDECADE because of a new strong anti-PBPRIME feeling.

I went to BQMIDDY Tuesday for 1700 hour contact.

16 October - With young [ ] contacted signal Laboratory a second time and provision was made to send [ ] as alternate for the required operator's course. The Major in charge of films complained bitterly about [ ] abusive treatment of this film equipment, and stated that for that reason we are on trial this time and that ZASEDAN would insist on better care to avoid torn films with inches of blisters on them coming back to their library. Left at 1250 by auto for BQMIDDY and met [ ] at doorsteps of LCLAVER at 1900. I had dinner with him at his house. Discussed the security flap of Radio LYCEUM report in which names of some of the instructors at the school were mentioned and general locale of the training grounds. Drove next morning to QKCURRY, October 17, and secured ZASENATE maps of KMWIDOW and HBHOIST for [ ] Procured them by driving out to the ZRCROWN Map Depot, a few miles out of BQMIDDY. Stopped in DTELDER at FJLAUGH, slept that night at FJLAUGH and left at 0400 hours for HTEXOTIC, arriving at the station 0900 hours Thursday.

19 October [ ] came in and griped about a recent unfavorable report turned in on his JBPARTSON and asked this office to endeavor to get ZASEDAN "off of his back". He reported that ZASEDAN is "picking on him" unnecessarily and he would like us to try to improve relationships between them. [ ] as contacted

TOP SECRET

to come in and pick up operational staff for school.

Reported [ ] returning that night.

[ ] medico, came in to inquire when ZRMETAL was sending a medico to LCFLAKE. He wants to set up a dispensary now for assessment team in LCFLAKE to screen the physical unfit before they enter these schools.

[ ] returned in the afternoon but his report was a total flap. He stated that, via his "special underground network", he was advised that Identity (3) was out on the loose again and had been contacting some of his JBPARTSON men in HTEXOTIC. Confronted by the fact that, only on the previous day, I had discussed the coming discharge date, December 3, of this man with [ ]

[ ] ZASEDAN KMCOCKY, DTCLDER, I informed [ ] his report was balony. His alibi: "My underground occasionally makes mistakes". I interpreted this as another one of the usual [ ] symptoms of self-importance.

20 October - Left 0630 hours for TPQREDO with [ ]

[ ] Arrived 1130 hours Monday (report on the meeting was discussed on the preliminary introduction to this report.) Returned Thursday, 25 October, arrived in HTEXOTIC 0130 Sunday, 28 October. End of trip.

29 October - Contacted Identity (4), who is the legal representative of the owner of the Wangness Estate, and arrangements were made to go to Identity (5) for luncheon as Roger T. Wangness' guest. Left Wednesday, 31 October, at 0500 for Identity (5) and arrived at target at 1245 hours; travel time 6 hours and 45 minutes, and on time. Lunched with Roger Wangness at the Baur-au-lac. The owner indicated clearly that he is anxious to sell the property (the prophecy that this office made a month ago and was cabled to ZRMETAL was almost the opening phrase at the lunch table: "The loss of the estate caretaker is irreplaceable; a faithful servant whose loyalty for some 40 years was proven. I feel now I have no further interest in owning the place.")

Roger Wangness pointed out difficulties involved for foreigners to obtain access to tax return figures on JBHOMER real estate, this being unlike PBPRIME practice where the Hall of Records are open to all. He indicated that the property, land and building was assessed somewhere around the equivalent of \$85,000, but the writer corrected this impression by stating the real assessment was \$73,000. From that point on, the owner took a more serious interest in the negotiations. The price he has in mind is \$90,000 for land and building, plus \$10,000 more for the interior furnishings and incidentals. The writer assured him, however, that the rugs, a few pieces of furniture, etc., were nowhere near such value and

that we would be

- 6 -

57764

TOP SECRET

that we would be totally disinterested in acquiring it. Negotiations can now carry on for several weeks before anything final need be consummated. Returned Thursday, taking off at 0330 hours, arriving at HTEXOTIC at 1030.
